

<b>Motorcycle Manufacturer</b>	<b><i>DUCATI</i></b>
<b>Model</b>	<b>MONSTER</b>
<b>Issue</b>	<b>4/99 – rev. 00</b>

<b>Recommended siting</b>	Under the fuel tank, in front of the battery.
<b>Power supply</b>	Connect the positive supply wire of the alarm system to the RED wire available in the 6-way connector of the harness coming out of the ignition lock, under the voltage regulator. Connect the negative supply wire to the earth point under the battery on the left.
<b>Engine immobilisation (1)</b>	Follow diagram B. Cut the ORANGE/BLUE wire found in the 6-way connector of the harness coming out of the ignition lock, under the voltage regulator.
<b>Engine immobilisation (2)</b>	Cut the BLUE/RED wire found in the 4-way connector of the harness coming out of the right switch, on the right side of the headlamp.
<b>Ignition controlled positive supply</b>	Connect to the same ORANGE/BLUE wire as used for engine immobilisation 1.
<b>Turn indicators</b>	Connect to the WHITE/GREEN and WHITE/BLACK wires found in the black connector that is secured to the right side of the frame under the seat.
