

Motorcycle Manufacturer	 SUZUKI
Model	GSX-R 1300 HAYABUSA
Year	//
Issue	06/99 Rev. 00

Recommended siting	Install the alarm system under the rear seat, in the tool-compartment, behind the light.
Power supply	Connect the positive and the negative supply wires of the alarm system directly to the battery terminals.
Engine immobilisation (1)	Follow diagram B. Cut the LIGHT BLUE/WHITE wire (<i>pick-up</i>) available in the white 2-way connector behind the left fairing, on the left of the battery.
Engine immobilisation (2)	Cut the YELLOW/GREEN wire available in the 4-way connector of the starter solenoid, placed under the left fairing, near the electronic control unit.
Ignition controlled positive supply	Connect to the ORANGE/GREEN wire available in the 2-way connector on the micro-switch that controls the lighting of the rear stop light.
Turn indicators	Connect to the BLACK wire and LIGHT GREEN wire of the rear turn indicators. These wires are available behind the left fairing.

Remark: to avoid backfeeds through the turn indicators, it is recommended to fit a diode to the ORANGE/GREEN wire that is connected to the flasher unit, in front of the fuse-box, on the left side of the handle-bar.
